Hi Susan

Thanks for the update. Will there be more in 2013? Or is that too far ahead?

Cheers  
Jennie

Hi Jennifer,

Sorry I haven't sent an update -- I think you've got a break until July. It looks like Doug is going back to Texas, but is limiting analytes so you shouldn't be receiving samples from that trip. I'm not certain what Rick has planned for Wyoming or what Wyoming has planned for Rick!! I'll let you know if I hear anything, but so far it looks pretty open until July. Maybe you can even get in a vacation or at least a long weekend! Take care, Susan

Hi Susan

Just checking to see if the 3/20 version of schedule is still applicable. It would be awesome to actually get caught up on my data reports before the onslaught starts again in July. Rick mentioned maybe going back to Wyoming?

Thanks,  
Jennie

Hi Jennie,

I understand your pain!! I'm determined to not have use or lose at the end of this year, as last year I had some and ended up sick during most of it. Bummer! Anyway, it looks like April will be busy but things should slow down in May from our sites. Take care, Susan

Thanks Susan, Please keep me posted as things evolve.

Even though I'm still the only glycol analyst, I'd like to try to plan a couple days off here and there over the spring and summer. I'm sure the fates are laughing at me for considering such a thing!

Cheers  
Jennie

Hi Jennifer,  
Sorry I didn't have you on the list. Please see attached -- it might change again!! Let me know if you have any questions.  
Thanks, Susan

All,  
Here's the latest update on the HF and Pavillion Field schedule -- no promises that it won't change tomorrow. Please let me know if there's someone else that should receive this information or if you'd like me to drop you from the distribution list. Thanks, Susan
